RAM Axioms

- If you have not met Prof. Ram, you do not know a **real generous and passionate man** on this earth.
- If you know Prof. Ram, you'll never say that you have **helped a lot of people**.
- If you have a telephone number of Prof. Ram when you are depressed, you won't be able to **resist calling Prof. Ram** before going to church or any other place offering comfort.
- If you did not meet Prof. Ram when he was younger than 50, you do not know **how large human memory can be**.
- It has been known that outstanding mathematicians do their best work before reaching the age of 40.
Pioneering-generation CS research leaders must have been of the same type
because **Prof. Ram's most profound publications all came out before 1966 as single-authored publications**.

RAM Axioms

- If you are thinking about telling your descendants to learn to imitate Prof. Ram,

stop it.

It will take another **couple of centuries** for the God to manufacture another outstanding brain combined with such magnanimity.

- If you think that there may be **another person like Prof. Ram** in science societies,
wash your foggy brain.

=> If you have met Prof. Ram, you belong to the **small group truly blessed by the God.**

In RAM96, 1996, Kane Kim said: "Although **CVR APPEARS** to be writing **recommendations** for everybody **indiscriminately**, I have realized through 25 year observations that: **Still the people who received CVR's recommendations are collectively the best group in the society. ★!★**

RAM Axioms

- If you have not thanked **the God** for anything, think about the fact that

He has kept Prof. Ram, the source of inspiration and encouragement in your life, **for 80 years in 1st-class condition.**

Also, the fact that **He will give us another 40 years of life with Prof. Ram nearby ☺!**
